DESCRIPTION

International Lubricant Company's Eco-Syn 0W-20 LL FS is a premium Full Synthetic oil specifically formulated for the newest VW/Audi (VAG Group) engine requirements to prolong the life of emissions systems. Using new technology to increase engine cleanliness, lower fuel consumption and has a safe lubrication film at high temperatures, **VAG Group has purposely coloured the fluid green which is not backwards compatible with any other existing VW/Audi specification (e.g VW 504.00/507.00, 505.01, 502.00, 505.00) due to its low viscosity.**

APPLICATIONS

ILC's Eco-Syn 0W-20 LL FS is specifically designed for VW/Audi newest engines **2.0 TFSI 140kW and 3.0 TDI CR 160kW** which calls for a VW 508.00/509.00 fluid. This extremely low viscosity fluid allows for high fuel saving which is met with extending, oil drain intervals and the lifetime of particle filters. This can only be used in engines which call for a specification VW 508.00/509.00.

BENEFITS

- Extreme protection against wear, corrosion and foaming
- Extends oil drain intervals.
- Maximizing fuel economy.
- After-Treatment System compatible.
- Coloured Green.
