LUBRICANT COMPANY

Diesel System Cleanse & Preserve

- 1 Working Time:** "WWO" Working While Operational.
- 2 Application:** Diesel Engines.
- 3 Usage:** 500ml per 100L.
- 4 Usage Intervals:** Every 6-8 months.

DESCRIPTION

International Lubricant Company's Diesel System Cleanse & Preserve is a high performance fuel tank additive which both increases engine performance while reducing and dissolving carbon and soot build up throughout a diesel engine.

APPLICATIONS

ILC's Diesel System Cleanse & Preserve fluid is a product from our WWO range (Working While Operational). This is applied to the fuel tank before you fill up.
Method of application: Add approx 1x500ml of product into fuel tank before use. (Approx 100L tank)
This is not a fuel substitute.

BENEFITS

- Reduce fuel consumption.
- Increase engine performance.
- Reduce wear on injection systems.
- Decrease exhaust emissions.
- Protects against corrosion.
