DESCRIPTION

International Lubricant Company's Euro LongLife ATF is a unique synthetic Automotive Transmission Fluid (ATF) formulated with a very high and stable viscosity index and with a very low pour point thus providing quick oil provisions in cold starting conditions across markets globally.

APPLICATIONS

ILC's Euro LongLife ATF is designed to be used in a number of American, Asian and European manufacturers of transmissions from commercial vehicles and in passenger, exotic and high performance cars. Making ILC's Euro LongLife ATF one of the most unique ATF fluids in today's market.

BENEFITS

- Very high and stable viscosity index.
- Very low pour point.
- Specific friction properties compatible with synthetic seals.
- Excellent Smooth Shifting.
- Colour Yellow/Brown.
