DESCRIPTION

International Lubricant Company's Super Gear Oil 75W-85 GL-4 is formulated specially for manual transmissions, transaxles, automotive axles with hypoid gears operating under low to moderate loads. Super Gear Oil 75W-85 is a low viscosity fluid that will assist in reducing shift lag at low temperatures, while reducing transmission noise and protecting vital components thus extending their working life.

APPLICATIONS

ILC's Super Gear Oil 75W-85 GL-4 is designed to extend the working life of transmissions and drive lines under extreme working conditions, with its extreme pressure additives this allows passenger cars, commercial vehicles and on or off-road applications outstanding performance in conditions of low speed high torque, high speed low torque. Suitable in General Motors, Mitsubishi, Toyota and other applications which require an API GL-4 specification.

BENEFITS

- Protect vital components.
- Outstanding EP additives.
- High shear stability.
- Very good antiwear protection.

APPROVALS & SPECIFICATIONS

API GL-4
