DESCRIPTION

International Lubricant Company's Super Gear Oil 75W-90 GL-5 is formulated specially for manual transmissions, transaxles, automotive axles with hypoid gears operating under low to moderate loads. Super Gear Oil 75W-90 is a fluid that will assist in reducing shift lag at low temperatures, while reducing transmission noise and protecting vital components thus extending their working life.

APPLICATIONS

ILC's Super Gear Oil 75W-90 GL-5 is designed to extend the working life of transmissions and drive lines under extreme working conditions, with its extreme pressure additives this allows passenger cars, commercial vehicles and on or off-road applications outstanding performance in conditions of low speed high torque, high speed low torque. Suitable in General Motors, Mitsubishi, Toyota and other applications which require an API GL-5 specification.

BENEFITS

- Protect vital components.
- Outstanding EP additives.
- High shear stability.
- Very good antiwear protection.

APPROVALS & SPECIFICATIONS

API GL-5 ZF TE-ML 08

(Check owners manual before use)
